

DPA 5 PRO

Quickstart Guide

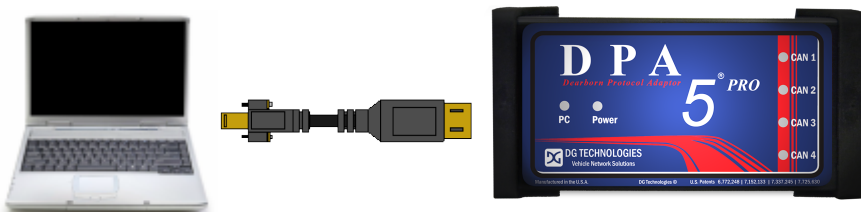

1

IMPORTANT

To Use the DPA 5 PRO
Download Installation Drivers from
www.dgtech.com/downloads

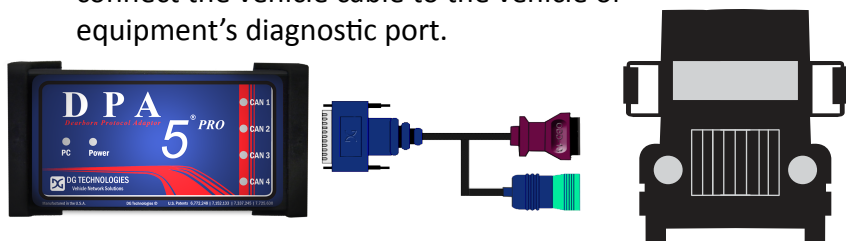

2

Connect the USB cable from the DPA to the PC.

3

Connect the vehicle cable to the DPA. Then,
connect the vehicle cable to the vehicle or
equipment's diagnostic port.

4

Configure your application to use the DPA.

Using DG Diagnostics:

Open Program, Select OBDII for Automotive or
MD/HD for all others.

Click File --> Configuration--> Select Device DPA 5 PRO

Using OEM Software:

Reference the *Setting Up Your Diagnostic Application* section
of the DPA 5 PRO Users Manual.
