

QUICK START GUIDE

VSI NxGen

To Get Started

1. Download Installation Drivers from:
www.dgtech.com/downloads
2. Connect the USB cable from the VSI to the PC (Fig. 1)
3. Connect vehicle cable to the VSI, then connect the OBDII end to the vehicle. (Fig. 2)
4. Verify connections by going to: Start > DGTech Utilities > Adapter Validation Tool.

5. Ensure "VSI NxGen" is selected in the Device drop-down of the Adapter Validation Tool software, and select "Run Test". Solid GREEN lines will indicate proper communications.

Thank you for choosing the VSI NxGen!

The User Manual can be found here:
www.dgtech.com/documents
